RESPONSIBLE VETERINARY AUTHORITY: Department of Agriculture, Land Reform and Rural Development,
Private Bag X 138, Pretoria, 0001.

ISSUING VETERINARY AUTHORITY: Western Cape Department of Agriculture, Private Bag X1, Elsenburg, 7607.

INTERNAL REFERENCE NUMBER:

VETERINARY IMPORT PERMIT: issued by the Ministry of Climate change and Environment on

A. DESCRIPTION

1. Identification of Animals:

Name	Microchip Number	Breed	Gender	Age/DOB	Colour

2. Origin of Animals:

2.1 Name and address of consignor:

2.2 Establishment of origin:

3. Destination of Animals:

3.1 Name and Address of Consignee:

3.2 Means of Transport:

B. HEALTH ATTESTATION (to be completed by a registered veterinarian)

The undersigned veterinarian certifies that the animal(s) described in section A above comply with the following:

- Are at least 15 weeks of age and are not any of the banned breeds as per the import permit.
- Are permanently identified by means of microchip(s) whose number matches the number of the microchip implanted in the animal(s). The microchip number on the animal matches that on the veterinary health certificate and vaccination documents/passports.
- Vaccination documents/passports bear the animal's microchip number, full description (species, colour, gender, date of birth) and fully meet all vaccinations requirements below including vaccine name, manufacturing company, batch number and vaccination date .
- The animals were over 12 weeks/3 months of age at the vaccination against Rabies whose validity is in accordance with the manufacturer's recommendation/instructions:

Animal	Vaccine	Batch	Manufacturer	Expiry Date	Validity Period	Vaccination Date

- In case of dogs, were vaccinated against Canine distemper virus, Canine parvo virus, Infectious canine hepatitis and Leptospirosis (the Leptospirosis vaccination can be replaced with a leptospirosis test).
In case of cats, were vaccinated against Feline panleukopenia, Feline rhinotracheitis and Feline calici virus as per below tabulated schedule:

Animal	Vaccine	Batch	Date

6. Serological testing for Rabies was carried out on a blood sample by an accredited laboratory done prior the shipment date. In case of a primary vaccination/discontinuity of vaccination at least 21 days have passed after vaccination against Rabies before testing whilst sampling can be done immediately after in case of a valid booster vaccination without having to wait out a 21 day interval following vaccination. The Rabies antibody titration test is at least 0.5IU/ml and was undertaken as per the below tabulated schedule:

Animal	Sample Collection Date	Accredited Laboratory	Testing Method	Result

7. Have been treated for internal and external parasites in the 14 days prior export according to the below tabulated schedule:

Treatment	Product	Active Ingredient	Date
Internal Parasites			
External Parasites			

8. In case of cats, have not been in contact with COVID-19 Human(s) or animal positive cases within at least 14 days before shipping *OR was isolated under our supervision for 14 days before shipping without showing symptoms of respiratory illness *OR were tested with negative results on a PCR test for COVID-19 within 96 hours prior to travelling.

9. Have been examined within 7 days of departure and found to be clinically healthy and fit to travel. Were transported according to IATA conditions for pet animal transport. Animal welfare legislations and standards were taken into consideration.
